PilotPlatform

Industrial IoT Platform

Lotec PILOT is an IoT Platform to collect various types of sensor data, send it to the server via communication interfaces, analyze the data and present it through Web and Mobile applications.

IoT Control Box

- 0-20mA, 4-20mA, 0-10V Analog Inputs
- Digital Inputs
- 5A/250VAC Normally Open Relay Output
- RS-232, RS 422/485 Interface
- LoRaWAN
- Built-in GPS and NFC
- Power Supply Options (Mains, Battery, Solar)

Management Console

- Cloud-based or On-Prem management
- Dashboard Screen
- Graphical Visualization of Sensor Data
- Settings (Data Collection Period, Formats, etc)
- Analysis
- User Management

Why PilotPlatform

Lotec PILOT is an IoT platform designed to adapt to the unique needs of any organization, ensuring operational efficiency. It offers comprehensive solutions for asset and resource monitoring, remarkable flexibility in sensor usage, easy data access, and powerful analytics.

Monitoring your
Assets and Resources

Flexibility to Use
any Type of Sensors

Easy Access to Data by Web
and Mobile Applications

Analyzing and
Reporting
